FAQs

1. Do healing crystals actually work?

Healing crystals are not scientifically proven to treat or cure illnesses. However, many people use them for meditation, focus, and emotional comfort, benefiting mainly from relaxation, intention setting, and the placebo effect rather than any measurable physical healing power.

2. What crystal is best for healing?

There is no single “best” crystal for healing, as each works differently. Amethyst is often used for calm and stress relief, clear quartz for energy and clarity, and rose quartz for emotional healing and love. Choice depends on personal intention and needs.

3. What two crystals cannot be together?

There is no strict scientific rule that two crystals “cannot” be together. However, in crystal healing, some practitioners avoid combining strong grounding stones like hematite with highly energizing crystals like moldavite, as their energies may feel conflicting or overwhelming for sensitive users.

4. How to use crystals for healing?

To use crystals for healing, choose a crystal based on your intention, cleanse it regularly, and use it during meditation, relaxation, or mindfulness practices. You can hold it, place it nearby, or incorporate it into daily routines as a symbolic focus.
